The Rising Tide project supports vibrant, thriving communities to attract business investment and talent by creating a sustainable path toward economic stability and growth. The Michigan Economic Development Corporation, Talent Investment Agency, and Michigan State Housing Development Authority—collectively, the Talent and Economic Development (TED) team—have committed their assets to engaging specific communities across the state in order to empower them to shape their future and maximize economic potential. This document was produced as part of that effort.

APPENDIX 76
EXECUTIVE SUMMARY

With the adoption of the Village’s first ever master plan, Newberry is embarking on a new chapter in economic and community development. This master plan serves as a living document to guide Newberry’s future development based on community needs and desires.

There are a few important state mandates and initiatives that served as the backbone for this effort. The Michigan Planning Enabling Act (MPEA), Public Act 33 of 2008, requires that the planning commission create and approve a master plan as a guide for development. Further, Project Rising Tide (PRT) is a statewide economic development program, envisioned by Governor Snyder and implemented by the Department of Talent and Economic Development (TED). Newberry is one of ten communities selected statewide and represents the Upper Peninsula region. The mission is to provide at-risk communities with the necessary tools to design and build a successful economic framework. Through this effort, the Village is committed to taking the necessary steps to create a physical and social environment conducive to economic success and wealth creation.

Newberry is the County seat of Luce County. Located within McMillan Township at its very southern end, the population of Newberry was 1,519 at the 2010 U.S. Census. Newberry is surrounded by miles of state forests and is considered one of two gateways to the Tahquamenon Falls area. The Village of Newberry has experienced an overall decline in population since 2000. When compared with the State of Michigan, Newberry has a relatively low median household income ($32,000), a low per capita income ($18,500), and a high percentage of families living below the poverty line (27%). Further, only 55% of Newberry
of-age residents participated in the Labor force in 2015. Communities were selected for the Project Rising Tide program based on income, poverty, and employment statistics.

Community leaders, local officials, and members of the public were engaged throughout the planning process. A Community Assessment was conducted by Michigan Rural Council and laid the groundwork for the master plan. The Newberry Planning Commission served as a Steering Committee to guide the master planning process. The Planning Commission was formed just before the planning process officially kicked off and met monthly to review existing conditions, develop an action plan and Future Land Use map, and craft the Zoning Plan.

Economic development is a top priority in Newberry, and economic development strategies served as the foundation for Newberry’s action plan. The Village has a number of sites that are currently fit to be redeveloped including the former Falls Hotel, the Pines building, and the Old Bank building. Because of the high quality public infrastructure already in place, Newberry is focused on incentivizing and supporting redevelopment first and foremost in the downtown.

Included in this plan are a series of goals and actions that can be broken into five major themes, which include: (1) Governance & Leadership; (2) Thriving Downtown; (3) Business Attraction and Retention, (4) Recreation-based Prosperity; and (5) Strong Neighborhoods. The final chapter of the plan identifies and prioritizes the goals and actions, and also provides ideas and tools for implementation.
INTRODUCTION

PLANNING CONTEXT
The purpose of this master plan is to serve as a living document to guide Newberry’s future development based on community needs and desires. A master plan is comprehensive in scope, but also provides more specific actions and site locations for implementing the community’s goals.

The Michigan Planning Enabling Act (MPEA), Public Act 33 of 2008, requires that the planning commission create and approve a master plan as a guide for development and review the master plan at least once every five years after adoption.

This master plan is of particular significance to Newberry since this will be the Village’s first ever comprehensive master plan to guide future development and growth in the Village.

RISING TIDE
Project Rising Tide (PRT) is a statewide program, envisioned by Governor Synder and implemented by the Department of Talent and Economic Development (TED). TED is comprised of the Michigan Economic Development Corporation (MEDC), Talent Investment Agency, and the Michigan State Housing Development Authority (MSHDA). The mission is to provide at-risk communities with the necessary tools to design and build a successful economic framework.

Newberry is one of ten communities selected statewide and represents the Upper Peninsula region. One community from each prosperity region was selected, based on the following criteria:

- Poverty level
- Unemployment level
- Labor participation rate
- Renter occupied units
- Vacancy rates
- Percentage of households receiving food stamps

This initiative employs MEDC’s Redevelopment Ready Communities (RRC) as a mechanism for preparing each community for a brighter economic future. RRC is a certification program that encourages communities to use innovative redevelopment strategies to signal to developers and businesses that they are attractive places to invest.
Newberry desires to be a place of economic opportunity, with everything from traditional employment options to entrepreneurial endeavors and development opportunities. The Village is committed to taking the necessary steps to create a physical and social environment conducive to economic success and wealth creation. The master plan is an important step to achieving this vision.

**REGIONAL CONTEXT**

Newberry is the County seat of Luce County. Luce County has over 300,000 acres of public access land, 15,000 acres of inland lakes and 658 miles of rivers and streams. It is primarily made up of State forestland and freshwater wetlands. Luce County borders about 31 miles of Lake Superior shoreline at its northern edge. Located within McMillan Township at its very southern end, the population of Newberry was 1,519 at the 2010 U.S. Census.

Newberry was designated as the moose capital of Michigan by the state legislature, in House Resolution 2002-572 and Senate Resolution 2002-259. The designation has been used to promote its uniqueness to visitors.

Newberry is surrounded by miles of state forests and is considered one of two gateways to the Tahquamenon Falls area (the other is Paradise, approximately 40 miles to the northeast).

**OTHER PLANS AND PLANNING EFFORTS**

There were a number of community and regional planning efforts already completed or underway at the time this master planning process began. In an effort to build on the positive momentum already underway, the following plans and strategies were used to inform the goals and objectives of this master plan.

**Village of Newberry Economic Development Strategy**

As a part of the PRT effort, the Newberry Steering Committee completed an Economic Development Strategy for the Village. The Strategy identifies key challenges and opportunities related to economic development, and also outlines a set of goals, objectives, and implementation strategies to enhance economic development in the Village and the larger region.

**2002 Luce County Comprehensive Plan**

The Luce County Comprehensive Plan serves as a guide for future decisions by County and member communities.

communities. Luce County provides zoning services for all Townships within Luce County.

2015 Eastern Upper Peninsula Comprehensive Economic Development Strategy

This report, titled Elevating the Eastern Upper Peninsula, covers the economic development trends, conditions, needs, and strategies for the three-county Eastern Upper Peninsula Region in Michigan and allows the region to maintain its Economic Development District designation to qualify for EDA assistance, loan programs, and planning programs. This strategy identifies a number of actions to create year-round diverse employment opportunities such as technical assistance, vocational training, data tracking, and inter-jurisdictional collaboration.

2016 Luce County Target Market Analysis

A Residential Target Market Analysis (TMA) was conducted for Luce County in 2016 by Land Use USA. The purpose of the TMA was to identify the housing needs and unmet housing market potential for communities in Luce County. The results of the TMA can be used to identify walkable neighborhood types and missing middle housing formats that would be successful in Newberry.

2015 Tahquamenon Scenic Byway Corridor Management Plan

The Scenic Byway runs along the M-123 Corridor from Eckerman to the Village of Newberry. The Corridor Management Plan includes an inventory of historical and natural assets, a traffic and safety analysis, and ideas for marketing the unique assets along the corridor.

COMMUNITY ENGAGEMENT

The Village of Newberry understands that citizen input is paramount to a successful planning process. Community leaders, local officials, and members of the public were engaged throughout the Rising Tide process in general community visioning exercises and goal setting specifically focused on economic development and downtown revitalization.

Parks and Recreation Master Plan

The Village of Newberry 2016-2021 Recreation Master Plan ensures Newberry will be eligible for MDNR grants and other funding opportunities through 2021. The plan identifies a number of different strategies for fostering economic development by improving and promoting recreational facilities and trails. One key action is the development of the Tequamenon Outdoor Recreation Complex.

2015 Tahquamenon Scenic Byway Corridor Management Plan

The Scenic Byway runs along the M-123 Corridor from Eckerman to the Village of Newberry. The Corridor Management Plan includes an inventory of historical and natural assets, a traffic and safety analysis, and ideas for marketing the unique assets along the corridor.

The plan identifies a number of different strategies for fostering economic development by improving and promoting recreational facilities and trails. One key action is the development of the Tequamenon Outdoor Recreation Complex.
Community Assessment

A Community Assessment was conducted by Michigan Rural Council and laid the groundwork for the master plan. The overall purpose of the community assessment was to identify assets, projects, goals, and areas for development. The community assessment is intended to empower communities by giving them the tools to plan for the future.

The Newberry assessment was held in May 2017 and consisted of listening sessions in which a number of stakeholder groups in the community had a chance to voice their ideas and concerns. A Village Hall meeting was held in the evening with a small but mighty group of attendees representing a broad cross section of Newberry residents. The following summarizes assets, challenges, and ideas/actions identified through this process.

**Assets**
- Low cost of living
- Dedicated community organizers
- Surrounded by pristine natural resources

**Challenges**
- Limited skilled workforce
- Resistance to change
- Isolated location

• Poverty is prevalent
• Limited housing options, especially rentals
• Aging building stock - both residential and commercial

Ideas for Action
• Create a DDA or Business Improvement District to rehab downtown
• Stricter enforcement of the blight code paired with rehabilitation assistance.
• Promote ecotourism and market natural resources.
• Coordinated business recruitment

The table called Community Assessment Results summarizes some of the key recommendations for further action made by Michigan Rural Partners based on the Community Assessment results.

Planning Commission
The Newberry Planning Commission served as a Steering Committee to guide the master planning process. The Planning Commission was formed just before the planning process officially kicked off and met monthly to review existing conditions, develop an action plan and Future Land Use map, and craft the Zoning Plan. The process of developing a Future Land Use map and zoning plan was particularly important in Newberry because the map and zoning plan will lay the foundation for Newberry’s first ever Zoning Ordinance.
This section will investigate the demographic trends and the historic and cultural resources in the Village of Newberry and its surrounding communities, to understand how the people and social capital have shaped Newberry over time, and what the future may hold. Trends in this community profile were used throughout the planning process to inform this Master Plan’s strategic goals and future land use classifications.

HISTORY

The village was named in honor of John Stoughton Newberry, a U.S. Representative and industrialist from the state of Michigan.

In the late 1800s and early 1900s Newberry, like many Northern Michigan towns, was a lumbering Chemical Plant, Lake Superior Iron and Chemical Co., Newberry, Michigan. Photo Courtesy of Jim Dwyer

town, with other industrial processes typical for the day. In the one mile stretch between the railroad and the Tahquamenon River to the north were the factory and lumber yards.

In 1882, some businessmen from Detroit with interests in the railroad established the Vulcan Furnace Company named for the Roman god of fire. The first industrial process undertaken on the property was making charcoal. The Village of Newberry eventually sprang up around it. Before then, Newberry was known as “Grant’s Camp.” As the years went on, Newberry’s growth and development continued to be rooted in lumber and industry.

"The people of our community are the only reason we are here. Therefore, we are committed to working with the community to provide ethical and responsible local government so that everyone can enjoy the benefits of living and working in Newberry.”

-Community Leader

POPULATION TRENDS

The figures in this section have been taken from the following sources in this preferred order:

- 2010 US Census. This is the gold standard for demographic data. It measures 100% of the population and offers depends on sampling. However, available data is limited to population and housing information, and the ten-year interval between data points means it is rarely “fresh.”

- 2011-2015 American Community Survey. The ACS program replaced the “long form” Census questions beginning in

ACS 5-Year Estimates 2011-2015

2000, asking the same types of detailed questions about social, economic, and housing conditions on a rolling basis instead of once per decade. The Village of Newberry has experienced an overall decline in population since 2000. The 2011-2015 ACS estimates the current population of Newberry to be 1,729. This trend closely aligns with Luce County, which experienced population growth until 2000, when the population witnessed a notable decline.

When looking at the population trends, it is important to keep in mind that the Newberry Correctional Facility is located just outside the Village limits. The population of 1,100 inmates is counted in the overall population of Luce County, and impacts the demographic trends.

**Age & Gender Distribution**

The distribution of males and females in Newberry is similar to that of the State average, with 51% of residents identifying as female and 49% as male. The median age is 42 years, which has increased since 2010 and is slightly older than the state average. The age distribution is fairly evenly distributed, although the age and gender trends reflect a larger trend throughout Michigan: younger people, aged 18-24, tend to leave for out-of-state college or immediately after graduating from
a Michigan university for better career opportunities. Because the numbers rebound in older age brackets, it is likely that those who left in their youth returned to Newberry later on.

**Income & Poverty**

The Village of Newberry’s median household income (MHI) is substantially lower than the state of Michigan’s, $32,000 to $49,576 respectively. Per capita income in Newberry is also significantly lower than the State average at $18,551. It should be noted, however, that per capita income has increased by 9.6% in Newberry since 2010. In the past 12 months, it was estimated that 27.1% of individuals are living below poverty line in Newberry. This compares with 19.6% and 15.7% in Luce County and the State of Michigan respectively. The 2011-2015 ACS estimates that 12.8% of households in Newberry have received Food Stamps/SNAP benefits in the last 12 months, compared with only 3.4% Statewide.

**Disability Status**

The disabled population is 25% in Luce County compared with only 14% in the State of Michigan. Luce County, as well as the State as a whole, is experiencing an overall increase in the number of disabled residents. A growing disabled population corresponds with a nationally aging population. The highest proportion of those who suffer from ambulatory and

**Educational Attainment**

The link between poverty and educational attainment is real. For those with less than a high school diploma the mean income is less than $12,000 per year, compared with over $45,000 for those with a Bachelor’s degree. It should be noted that a Bachelor’s degree does not guarantee gainful employment; however, the rates of poverty are significantly lower with a post-secondary degree.
self-care difficulty are senior citizens. It is important to track types of disabilities and how they change over time in Newberry and the region because residents with mobility constraints require different housing and community amenities to meet their needs.

Race
Newberry continues to be primarily white (89.1%). However, it is interesting to note that Newberry has seen a substantial increase in the number of individuals who identify as American Indian or Alaska Native. From 2010 to 2015, this number jumped from 5% to 12%. It should be noted that because of a small sample size, the ACS estimates have a relatively high margin of error.

Health Statistics
Although the Village of Newberry and Luce County have considerable natural resources for outdoor activity and exercise, Luce County residents are less healthy than residents of other counties in the State of Michigan. Based on the Robert Wood Johnson County Health rankings compiled in 2016, Luce County is ranked 70th of 82 in Michigan for Quality of Life (1 county did not have sufficient data), which is based on overall physical health, mental health, and birth weight data. Notably, the County ranks 8th in length of life. The County Health Rankings & Roadmaps program is a collaboration between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute. Health outcomes represent how healthy a county is, and are measured by how long people live and how healthy people feel while alive. Health factors represent what influences the health of a county, and are measured by health behaviors, clinical care, social and economic, and physical environment factors. Probably most disconcerting is that Luce County is ranked 79th out of 82 counties for health behaviors, which is a score for indicators such as food security, drug overdoses, and motor vehicle crash deaths.

This chapter summarizes the natural resources, including water, soils, and wildlife; facilities like water, sewer, broadband accessibility, and parks; and existing land use.

**Natural Features**

Newberry, and the surrounding area, is defined by its pristine natural features including prime woodlands, high water quality, and abundant wildlife. The Village is fairly flat, with rolling hills in the surrounding forested areas.

There is general agreement by community members that while Newberry is home to some of the most beautiful natural features in the state, many of the attractions are not well known to people outside of the community due to the fact that the tourism association does not function effectively. There is a strong desire to brand Newberry with a unique identity. Much of the foundation for Newberry’s community identity will be its high quality natural resources.

**Watershed**

Newberry is located within the Tahquamenon River Watershed. According to the Eastern Upper Peninsula (EUP) Watershed profile prepared by the Chippewa Luce Mackinac Conservation District, this subwatershed is 517,968 acres and is part of the greater EUP watershed.

Land cover in the EUP watershed is predominately forest and wetland. Seventy-eight percent of the watershed is forested, while 13% is composed of wetlands. Less than 10% of the watershed is considered developed for urban or agriculture. Most of the land is in public ownership, either through State ownership (41%) or Federal (15%).

**Water Quality**

As a part of a 5-year monitoring cycle for watersheds in the state, the Michigan Department of Environmental Quality has identified erosion as a concern along the Tahquamenon River from a variety of sources, including agriculture operations, past logging operations, and road/stream crossings. The Tahquamenon River has been significantly altered by historical logging operations, and erosion issues continue to occur at road/stream crossings.

DRAFT - Updated October 2017
and in developed areas along the lakeshore.

Forests
Luce County is relatively flat with large expanses of open peat-lands and forested lowland swamps. The Eastern Upper Peninsula State Forest Management Plan states that lowland open/semi-open lands make up 19% of the EUP, northern hardwoods 11%, aspen 11%, cedar 11%, and jack pine 9%.

As public land is transferred to private ownership in much of the Upper Peninsula, the overall health of forested areas is threatened because of habitat fragmentation. Forests become fragmented and diminished as land is cleared for buildings, lawns and roads. Fragmentation hinders ecological functions, especially habitat for wildlife.

Additionally, there are a number of forest insects and diseases that are threatening forest conditions in the EUP; the most significant of these are beech bark disease, spruce budworm, and emerald ash borer.

Wildfire
Wildfire is a very real concern in Luce County and the Village of Newberry. In 2007, the Sleeper Lake Wildfire burned 18,185 acres in McMillan Township, just north of the Village. In 2012, the Duck Lake Wildfire burned 21,069 acres, causing Governor Snyder to declare a state of disaster in Luce and Schoolcraft counties. Numerous campgrounds and other recreational facilities were closed as well as ORV trails and county roads.

Although homes and businesses in Newberry are not generally directly under threat from wildfire, the impacts of wildfire have far-reaching consequences on tourism, local businesses, and the overall quality of surrounding natural habitat and forestland.

Wetlands
Wetlands are an important natural resource. They provide a number of important ecosystem services, including flood control, nutrient and pollution filtration, groundwater recharge, and habitat for plants and wildlife. The Village has a number of wetland areas north of the railroad tracks, 18 acres of which are within a designated brownfield.

Soils
The soil characteristics recorded by County Soil Survey form the base of knowledge on a variety of development-related factors. Understanding soil profiles and compositions is key when evaluating development needs.

Most soils in Luce County have severe agricultural limitations that make them unsuited to cultivation.

The majority of the Village has a sandy soil association, which is suitable for development and is well-drained. In the northern portion of the Village, the soils are more loamy and less well-drained, located along streams, old drainageways, and small embankments (Luce County Soil Survey). The northern portion of the Village has slight elevation grades, wetlands, and hydric soils.

Recreation
Local residents are quick to highlight that you can drive to 6 of the 7 Wonders of Michigan within a few hours of the Village limit. Newberry’s close proximity to tourist attractions is a big asset that the community hopes to leverage for economic development.

Newberry’s Recreation Master Plan identifies a number of recreational amenities within the Village, as well as opportunities for expanding amenities within the Village and the surrounding area. Newberry has four parks located within the Village; these include The Curt Kneirim Memorial Park, Sherman Park, Atlas Park, and the site of the Tahquamenon Outdoor Recreation Complex. The Village plans for more playground facilities at the local parks.

Tahquamenon Outdoor Recreation Complex
The Tahquamenon Area Recreation Authority (TARA) is made up of four units of government - Pentland and McMillan Townships,

DRAFT - Updated October 2017
Luce County and the Village of Newberry. The authority was formed to construct a new skating facility for Newberry.

The new complex will be located on the former Iron Charcoal Facility north east of the crossing of M-123 and the Canadian National Railroad, just north of historic downtown Newberry. The site is located on a brownfield, and the community used MDEQ funds for clean-up, remediation, and towards redevelopment of the brownfield in Phase 1.

TARA was awarded a Natural Resources Trust Fund Grant with the Village of Newberry for $300,000 to partially pay for the synthetic ice which is currently located in the Barn.

Tahquamenon River and Falls

The popular Tahquamenon River and waterway is located within a mile of the Village. The Tahquamenon River is a recreational jewel in the region, and one that the region hopes to better leverage for placemaking and economic development.

The river is 94 miles long and drains approximately 820 square miles. It begins in the Tahquamenon Lakes in northeast Columbus Township in Luce County. M-123 runs alongside a portion of the river north of Newberry.

Tahquamenon Falls State Park is Michigan’s second largest park.
Newberry Water & Light is the municipal utility for the Village of Newberry and surrounding residents. The utility provides electrical, garbage, water, and sewer services to residents. The Village also provides electrical services about 1.5 miles south of the Village to businesses located along M-123. Newberry Water & Light provides an exceeding 40,000 acres. The Falls are the second largest waterfall east of the Mississippi. Half a million visitors come each year to marvel at the spectacular waterfalls.

**Cultural Resources**

The Village is ripe with historical and cultural resources that contribute to its identity and shape what Newberry is today. Located within the Village of Newberry is the Luce County Historical Museum, the Luce County Historical Society, and the Taqua-Land Theater. The Community Institutions map shows the location of these facilities as well as other public institutions in the Village.

Just outside of the City limits is the The Tahquamenon Logging Museum. Situated on 29 acres on the shores of the Tahquamenon River, the museum features artifacts from Michigan’s early days of lumbering. There is an opportunity to improve access to the Tahquamenon River at this site for fishing and other recreational activities.

During a community visioning session, a number of participants expressed a desire to foster and support cultural groups and local artists. The desire for year-round entertainment, more recreation activities, and more civic events was also expressed.
Energy Optimization Program for customers to reduce energy demand and reduce the monthly payment burden for customers.

Garbage service is provided for all Village residents and the Village is also looking at adding recycling drop-off services with funding from a DEQ grant.

Sanitary Sewer System

Newberry Water and Light provides continuous sewer infrastructure for all residents and businesses within the Village as well as portions of the surround Townships. Rehabilitation of the Waste Water Treatment Plant is currently underway as of summer 2017.

Water Supply

Water service is also supplied by Newberry Water and Light. Water lines extend to all residents and businesses within the Village limits as well as some property owners located in surrounding Townships.

The Phase 5 Water Project, which was funded through United States Department of Agriculture Rural Development, assisted the Village in replacing approximately 90% of the water lines and refurbishing the water tower.

DRAFT - Updated October 2017
Stormwater Management

Street trees provide a great opportunity for adding green infrastructure by reducing stormwater runoff and increasing air and water quality. The Newberry Recreation Plan notes that the Village has an aging stock of trees, many of which line the main corridor. Unfortunately, many are being cut down as they become hazards and are not being replaced.

In the future, the Village will need to address stormwater infiltration to reduce negative impacts of extreme rain events on infrastructure, especially considering their increase in frequency and intensity as a result of a changing climate. Currently, there are areas within the Village that are overwhelmed with flooding during and immediately after extreme precipitation events.

Communications

The Village sees high-speed Internet connections as an essential tool for economic development and has worked to get higher speed broadband services to Newberry residents. The Village has secured fiber optic in the Downtown from Hiawatha. By ensuring better broadband access, more people may be incentivized to work remotely in Newberry. Fiber optic will also provide an incentive for a business incubator or other start-ups to locate in the Village.

Schools

There are five secondary schools, a Community College, and a University within a two-hour drive of the Village.

The Newberry Elementary School, Middle School, and High School are all co-located within the Village. Although the schools are a recognized asset, community leaders expressed concerns of an underfunded school system, both from the perspective of diminishing population and deterioration of building conditions.

Newberry Correctional Facility

The Newberry Correctional Facility is located just outside of the Village limits in Pentland Township and was part of the former Newberry Regional Mental Health Center. The Newberry Correctional Facility consists of seven interconnected, 80-bed units, two-bed housing units, one 88-bed unit, 134-bed unit, a 32-bed housing unit and an adjoining educational building.

Existing Land Use

The existing land use map was developed by the Newberry Planning Commission with assistance from the Newberry Code Enforcement Officer. Volunteers and Village officials conducted a detailed windshield inventory, categorizing all land uses into seven different categories, which include Residential, Central Business District, Community Commercial, Social/Institutional, Industrial, Open Space, and Vacant/ Unclassified.

As is the case in most urban incorporated cities and villages, the majority of the Village (65% of total land area) is considered urban and built up. The portion of the Village located north of the railroad tracks is predominately forested and/or wetlands (25% of total land area).

This detailed inventory of existing land uses will allow the Village to establish zoning districts that are based on historical development patterns and existing land use conditions.
One challenge for Newberry and the greater county is transitioning from a rural community, heavily reliant on government jobs, to a community that leverages all available assets and strengths to retain the next generation of skilled workers.

Luce County’s natural resources provide an abundant and accessible asset which can be utilized and expanded. While natural resource based jobs derived from resource extraction and commodification will not disappear, Newberry has the opportunity to leverage its natural resources for tourism and recreation as well.

Like many other sparsely populated regions in Michigan, Newberry will need to figure out how to retain smart, educated young people.

Employment Trends by Industry

Education, Services, & Health Care & Social Assistance collectively account for 23% of all jobs in Newberry. This is rivaled by Public Administration, which represents almost 19% of total employment. In addition, Retail Trade represents about 17% of employment.

Largest Employers

Because Newberry is the county seat and the only incorporated community in Luce County, many of the jobs in the region are concentrated within the Village limits, and the largest employers within the Village are government-based. Thirty percent of Newberry workers are classified as government workers, as compared with a statewide average of 12%.

The following are the largest employers of Newberry residents:
1. The State of Michigan
2. Luce County
3. Helen Newberry Joy Hospital
4. Tahquamenon Area Schools

Retail Leakage

Esri Business Analyst is a proprietary software program that compiles privately-generated market research data and Census information. It is a useful tool to determine retail potential within a community and its surrounding service area.

For Newberry, a Retail MarketPlace Profile was generated for a 10 minute driving radius surrounding the Village of Newberry, which encompasses a population of just over 4,000 people.
The Leakage/Surplus Factor presents a snapshot of retail opportunity. This is a measure of the relationship between supply and demand that ranges from +100 (total leakage) to -100 (total surplus). A positive value represents ‘leakage’ of retail opportunity outside the trade area. A negative value represents a surplus of retail sales, a market where customers are drawn in from outside the trade area.

According to the report, there is a 100% leakage of people going outside of the region to access home furnishings, lawn and garden supplies, specialty food and drink, shoes and clothing, and books/media. Of course, it is not realistic that the Village and surrounding township can accommodate all of these goods and services within this 10 minute radius, but these are opportunities for the Village to consider when looking to attract new businesses.

It appears that there are also services that people are coming from outside the area to Newberry for. Examples of these goods and services includes building materials, general groceries, florists, office supplies, and drinking establishments. These could be niche markets that Newberry continues to grow and leverage by attracting new businesses to these industry groups.

### Participation in the Labor Force

In 2015, only 55% of Newberry residents aged 16-65 participated in the Labor force. This is substantially lower than the State average of 63%. Concerns raised by community leaders over lack of jobs and an aging population could be contributing to this figure. A combination of attracting workers to the community and expanding job opportunities for existing residents could push Newberry closer to the state average.

ACS 5-Year Estimates 2011-2015
Talent Pipeline

According to the 2013 Governor’s Economic Summit, 85% of projected jobs will likely require a bachelor’s degree between 2012-2021. Yet, Michigan has the highest rate of educated youth leaving the state; at about 4% per year that’s more than double other Midwestern states. Michigan ranks in the bottom five states for the percentage of 25-34 year olds. Stakeholders in Newberry noted a lack of vocational training or support for technical jobs. The result is a lack of qualified workers as well as a movement of young people to other parts of the country with more educational and training opportunities.

Job Growth

With a historically accurate track record, the University of Michigan Research Seminar in Quantitative Economics estimates there will be almost 42,000 jobs created in 2017 and another 50,000 jobs in 2018. However, this job growth rate projection falls short of reaching residents who often remain chronically unemployed. In 2016, according to the Current Population Survey, there were 237,600 unemployed workers in Michigan—a figure that does not include discouraged workers, or those who have stopped actively looking for work because they believe there are no jobs available. In 2016, the Bureau of Labor of Statistics estimated the discouraged workers to be around 18,300 in Michigan. This leaves a gap of over 163,000 jobless Michiganders. That is to say, that job growth in itself is not a comprehensive enough indicator to describe a person’s economic opportunity. Regardless of the type of occupation, there is some truth to the statement that “there are no jobs.”

While the percent of individuals who are employed over the age of 16 has grown in Newberry over the past five years, poverty has not seen similar positive gains. In the past 12 months, it is estimated that 27% of individuals in Newberry are living below poverty line and 13% of households in Newberry have received Food Stamps/SNAP benefits in the last 12 months.

Transportation

Transportation plays a major role in job accessibility. In 2015, the Michigan Works! interviewed 400 of its clients, former job-seekers. Almost half (48%) of the interviewees reported that transportation is a problem for finding and keeping a job; those with reliable access to a vehicle are more likely to be employed. Transportation by automobile is most households’ second largest expense (up to $15,000 per year), leaving those in poverty without a reliable way to connect to employment. Furthermore, in Region 9, 56% of workers with cars cannot necessarily afford repairs. The need for improved transportation networks is affirmed by the high demand for transportation services requested through other MiWorks! agencies: 76-92% of all requests are for transportation assistance. Transportation options are very limited in Newberry. Without a reliable personal automobile, workers are quite limited in where and when they can work.
MASTER PLAN

HOUSING

Many communities are dealing with the complicated relationship surrounding housing values, vacancy rates, and changing tenure, and how this affects a community’s prospects for attracting and retaining talent. Much of the housing stock in Newberry is not in good condition. Although real estate can be purchased very cheaply, many residents do not have the resources to afford improvements or regular maintenance and upkeep. During public input sessions, Newberry residents are quick to note that rental housing opportunities are almost nonexistent within the Village limits.

Some MiWorks representatives working on the ground with employers also report that when companies find qualified candidates, there may not be homes available for him/her to live within the community. This is due in large part not only to a shortage of jobs post-recession, but also to a lack of housing options. Housing formats that lie along the spectrum of single-family detached homes, and large apartment complexes, are missing. For those who wish to live in a condo, townhome, loft, or midrise apartment complex downtown, they are out of luck.

EDUCATION AND TRAINING

The largest labor mismatch comes from middle-skilled jobs. In Newberry and the Upper Peninsula as a whole, natural resource extraction was the primary economic engine. Now, as the knowledge economy and technological innovations drive much of the economy, many rural parts of the Upper Peninsula have struggled to keep pace.

With a rebounding economy, manufacturing and construction have seen an uptick in activity, but are hindered by an untrained workforce. Middle-skilled jobs refer to jobs that require more than a high school degree but not necessarily a bachelor’s degree, typically an associates degree or some technical training. In 2015, 54% of jobs were middle-skilled, but only 48% of workers were trained for these jobs. A 6% difference equates thousands of workers out of work. Below, are some shortcomings in both the public and private sector that have contributed to this gap.

PUBLIC

- Federal cuts to career, technical, and adult education in 2012 that are only recently being funded again
- Michigan state funding tied to ratio of college-bound students
- Little effort to teach soft skills

PRIVATE

- Drop in the amount of apprenticeship programs through employers eroding a pathway to middle-skilled jobs
- Less private/corporate money spent on employee training and education
- Stagnating wages

STIGMA

Well-intentioned parents are often at the forefront of steering children away from working in factories with claims that the work is dangerous, unstable, and low-paying. Some of their trepidation stems from images of polluting factories, jobs being shipped offshore, and stagnating wages. According to a survey conducted by the non profit organization, SME, 20% of parents surveyed think manufacturing is outdated and nearly 25% think it is not well-paying, half of all respondents do not think it is exciting or challenging.
Unemployment
Notably, Newberry has a low unemployment rate of only 7.7%, significantly lower than the State average. This number could be lower because fewer individuals are claiming unemployment or because individuals are underemployed.

Entrepreneurs
Community members noted one positive attribute of the economic climate: Newberry has a relatively low start-up cost for new businesses. For example, there are historic buildings for sale in downtown Newberry for as little as $35,000. While many of these buildings require substantial improvements and investments, the start-up costs are much lower compared with other communities.

Incubators
There are a number of small communities in Michigan that have taken a proactive approach to promoting an inviting atmosphere for small scale business start-ups through development of a business incubator program. A retail business incubator could provide a collective place for start-up companies to build clientele and capital. For example, individuals can often lease space by square foot on a monthly basis, with the goal of helping the businesses work towards relocating to a permanent building. In addition to space, businesses often will have access to training and business development. This is a strategy that Newberry may want to explore.

The former Falls Hotel is the site of a successful coffee shop in downtown Newberry called The Falls Great Waters.
Transportation networks and connectivity are the cornerstones of a modern society. Our economy, and increasingly our social lives, depends on how well cities are linked to goods and services.

Within Newberry, transportation corridors provide residents, employees, and visitors with easy and affordable access to businesses, recreational amenities, schools, and other key services.

Downtown Newberry is aligned along Highway 123 (Newberry Avenue) and links the village south to Highway 28, which is ideal for leveraging drive-by traffic. As shown in the Traffic Flow map, approximately 7,300 vehicles travel through this corridor daily.

Newberry is typical of historic villages and small cities: when designed, streets were laid out in a grid pattern. This type of design creates small blocks and numerous cross-streets.

**Corridor Types**

Roads within communities across the country are categorized by the National Functional Classification (NFC) System. The NFC is a system developed by the Federal Highway Administration to classify all streets, roads, and highways according to their function. The NFC system classifies roads into the following categories, from the most intensively used and highest speeds, to the least intensively used with lower speeds:

- Principal Arterial
- Minor Arterial
- Collector
- Local

The Road Classification Map shows where the roads that are classified are located within the Village.

It is interesting to note in the Traffic Flow map that the majority of traffic flows through the Village north-south through downtown on Newberry Avenue. However, because the number drops off north of the railroad tracks, it appears that people are not passing through the Village. Instead, they are probably accessing amenities in the Village, and leaving south out of town, the same way they entered.

TRANSPORTATION TYPOLOGIES

Another way of understanding the roadways and corridors within a community is by identifying typologies. Transportation typologies are categories with loose definitions for describing the various options a person has as a driver, cyclist, or pedestrian. Transportation typologies are based on the following criteria:

- its physical conditions;
- how it accommodates its users;
- the surrounding land uses; and
- the development intensity.

These typologies differ from the National Functional Classifications because they assess how a road is viewed by users other than just drivers. These typologies are not exact, but provide a description of different options for how roads can suit users’ needs over time.

Main Street

Newberry Avenue (also known as M-123) is the principal, or main, street that runs through the downtown. This type of street should serve as many users as possible and offer an attractive ambiance. With an average right of way of about 100 feet, speed limits are slower to make pedestrians more comfortable during their downtown experience.

Commercial Arterials

Commercial arterials prioritize vehicular mobility between residential neighborhoods. Vehicular mobility is usually measured by flow of traffic and speed limits, and are therefore less pedestrian-oriented. This type of corridor contains retail stores with a large footprint or retail closer to the right-of-way. In this case, the northern and southern portions of Newberry Avenue also function as a commercial arterial.

Neighborhood Connectors

Neighborhood connectors provide access to neighborhood commercial properties and multi-
family housing. They may also serve as residential collectors, but mobility is still second to access.

Examples:
- McMillan Avenue
- Truman Boulevard

Residential

A residential street provides access to individual residential properties for motorized vehicles, bicycles, and pedestrians. They carry traffic that has a destination or an origin in a residential neighborhood. They may also offer on-street parking. Most residences in Newberry front on paved streets. Few of these paved streets, however, have curbs and gutters.

Examples:
- Harrie Street
- John Street

TRANSPORTATION MODES

Michigan is a car-dependent state. Newberry is no different. Eighty-seven percent of workers commute alone to work by car. However,
it is interesting to note that 11% of Newberry residents reported walking to work, versus less than 1% in Luce County, indicating that the walkable urban design of Newberry facilitates more transportation choices than the surrounding townships.

Commute Time
Newberry residents report spending an average of 12 minutes getting to work each day, which is about half that of the state average. Although Newberry is spread out, congestion and slowed traffic are not issues for Newberry residents.

Complete Streets
There has been increasing public awareness, led by organizations like Smart Growth America, that streets should be designed for pedestrians, bicyclists, motorists, and public transit users of all ages and abilities. This concept, called Complete Streets, means that public rights-of-way are designed for everyone, not just vehicles.

Instead of measuring a successful road by vehicular mobility, Complete Streets look at design elements, safety, and convenience for all users. In 2010, Complete Streets legislation passed in Michigan that requires MDOT to consider multi-modal features with new road construction. Elements of a Complete Street differ by community, but common characteristics are sidewalks, bike lanes and racks, frequent and safe crossings, median islands, curb extensions, and elements that enhance the experience of using a street to encourage multiple modes. The idea is to reduce reliance on automobiles to shift the bias from mobility to accessibility.

Newberry's Complete Street Elements
Newberry sees non-motorized infrastructure as both an equity issue to ensure that all residents have access to safe and affordable transportation options, as well as an economic development strategy.

The Michigan Department of Transportation funded a resurfacing and road diet project on three miles of M-123 N from Hamilton Lake Road through downtown Newberry. By investing in non-motorized infrastructure, the Village can use placemaking to attract and retain talented workers as well as better position themselves as the recreational hub of the Eastern Upper Peninsula.

Sidewalks
Although progress has been made, community residents note that a disconnected sidewalk system negatively impacts walkability.

Newberry has fairly consistent sidewalks along Newberry Avenue. A special emphasis has been placed on routes that children regularly use for getting to and from school. Newberry had a walking audit completed, which informed infrastructure investments funded through a Safe Routes to School Grant. Under this funding, three important routes to school were paved. As a part of this effort, the Village also made a commitment to regular snow removal along those routes.

The map “Walkability Score” shows the relative ease one can get around the Village by foot, and
Walkability Score Map

Village of Newberry

Walkability Score

Data Sources: Eastern Upper Peninsula Regional Planning and Development Commission

This Walkability Map is based on business diversity and recreational opportunities in relationship to trail, sidewalk, and road intersections. A high score correlates to many recreational opportunities and a large variety of businesses within a 0.75 mile radius.

Legend:

how many community destinations are within a reasonable walking distance. The blue colors indicate a Walkers’ Paradise, where most errands can be accomplished on foot and many people get by without using a car. The walkability decreases on the color spectrum all the way until red, which indicates a car-dependent environment, where it is very difficult to access goods and services without an automobile.

**Streetscape Design**

To improve walkability and sense of place, many communities are making streetscape improvements. These can include landscaping, lighting, traffic calming, and other public amenities.

The idea is to create a sense of place in the public right-of-way as opposed to a through-way. Improvements in streetscaping improve safety and perceived safety, and can also spur economic investment by improving visual appeal.

Newberry has already invested in significant streetscaping improvements along Newberry Avenue and plans to continue to pursue funding for additional projects, focused on the Central Business District.

Crosswalks are one component of streetscaping that have significant benefits for improving access and safety for pedestrians. Crosswalks can be mid-block crossings or, more commonly, found at intersections. Downtown Newberry could benefit from additional marked crosswalks across Newberry Avenue. Newberry also serves as a gateway into the community from both the north and the south. Beautifying these entrance points could do a lot for Newberry’s curb appeal.

**Bicycle Amenities**

There are two primary types of bicycle facilities that are appropriate for a community of Newberry’s size. These include:

- Bike Lanes, which provide an exclusive space for bicyclists within the existing roadway. Bike lanes are generally 4-6 feet wide and are most appropriate on roadways with speeds not exceeding 25 mph. Newberry could consider a bike lane on Newberry Avenue as well as on McMillan Avenue.

- Non-Motorized Paths, which provide an exclusive space for non-motorized transportation modes completely separated from the roadway. These paths are wider than sidewalks and often follow green spaces, abandoned rail beds, or might be adjacent to natural features like rivers. Newberry currently has one path at Atlas Park and one planned at the new Tahquamenon Outdoor Recreation Complex.

- Shared Lane Markings (SLMs), or “sharrows,” are road markings used to indicate that the roadway is an appropriate environment for bicycles and automobiles to co-exist. Although not considered a facility type, a sharrow is useful on low traffic roads to remind automobiles that the roadway is intended to be shared by all users, and can also assist bicycles with wayfinding.

**Trails**

The Village is interested in improving access and connectivity to recreational opportunities for non-motorized and motorized trail users. Each winter, thousands of snowmobilers descend on Newberry and the surrounding community. Improved snowmobile access in town could mean more business for local restaurants, coffee shops, and lodging facilities.

Trails can be a significant driver of economic development in a community, especially in the New Economy, where people tend to chose where they want to live based on community amenities they will have access to.

Trail Towns is an economic development strategy aimed at leveraging recreational trail amenities for economic development by improving connections between the trail head and the Central Business District.

Newberry has already embraced this idea and is an official Trail Town of the North Country Trail. In Newberry there is opportunity

to further capitalize on the fact that people are already coming to enjoy the natural resources of the surrounding area.

**WAYFINDING SIGNAGE**

As a part of establishing an identity and bringing people into the Village, Newberry plans to invest in better wayfinding signage, both into the Village and around the Village. A uniform set of signs demarcating key destinations would be useful for people traveling by vehicle as well as trail users and pedestrians.

**AIRPORT**

The Luce County Airport is located in Pentland Township and supports general aviation uses.

**RAIL**

The Canadian National Railway connects the Village of Newberry west to the City of Munising (Marquette County) and east to the City of Sault Sainte Marie (Chippewa County).

**PASER RATING**

Although not always at the forefront of economic development discussions, the quality of a community’s roadways play an important role in the visitor’s experience and the overall desirability for business looking to locate there.

Newberry Avenue from the southern tip of the Village limit to the railroad tracks has a PASER (Pavement Surface Evaluation and Rating) of 10, on a scale of 0-10, with 0 being the poorest condition. This mandatory visual survey conducted is conducted by they are conducted by a team of representatives from the municipality, MDOT, and the regional planning agency. It should be noted that the PASER rating was conducted in 2016, just before MDOT funded a full repaving of Newberry Avenue. If the road were to be re-valuated, it would probably receive a much lower score.

The other roads within the Village limit that received a rating include McMillan Avenue (rating of 6) and County Road 466/Victory Way (rating of 4/9 depending on the segment). The remaining streets within the Village did not receive a rating.
Newberry has well-established, attractive neighborhoods. These neighborhoods help define the character and unique sense of place within the Village. The preservation and enhancement of these neighborhoods is essential to the Village’s success. Homes are the building blocks of neighborhoods, and a diverse housing stock lays the groundwork for healthy neighborhoods. This chapter explores the housing conditions and neighborhood typologies in Newberry.

HOUSING PROFILE

According to the American Community Survey, there are approximately 910 total housing units within the Village of Newberry. The age of the housing stock would make many Newberry neighborhoods eligible for listing on the National Register of Historic Places. Forty-one percent of these units were built prior to 1940, 22% were built in the 1940s, and 12% were built in the 1950s. There was a lull in the 1960s with only 29 units constructed, and a small boom in the 1970s (12.7% of total supply). With so many older homes, there is a wealth of cultural heritage, but also a daunting maintenance challenge. According to the ACS, there were not any homes constructed within the Village between 2010 and 2015.

Fifty-three percent of housing units in Newberry are owner-occupied, while 27% are renter-occupied. The percentage of renter-occupied housing units in Newberry is slightly higher than the state average and significantly higher than the rate in Luce County, which is only 13%. In general, urban areas have lower rates of home ownership compared with their rural counterparts.

Most homes in the Village are single-family, detached (83%). The median housing value of owner-occupied housing units in Newberry in 2015 was $51,100. This compares with a county and state median value of $74,200 and $122,400 respectively.

During a community visioning session, community members noted the relatively low cost of home ownership in Newberry as both a positive and a negative. While it is affordable for families to buy a home in Newberry, many of the homes are in disrepair.
Even more notable is that 54% of renters spend over 30% of their income on rent, as measured using the Gross Rent as a Percentage of Household Income (GRAPI).

**Housing Target Market Analysis**

According to the 2016 Housing Target Market Analysis, the Village of Newberry will need to intercept migrating households that are choosing other locations in Luce County if the community wants to experience population growth. This can best be accomplished through a combination of reinvesting in the downtown, growing small businesses, and adding amenities through a placemaking strategy.

Based on the Target Market Analysis results for an aggressive scenario, there is a maximum annual market potential of up to 10 attached units throughout Luce County, plus 97 detached houses (for a total of 107 units). Among the 10 attached units, about one third (1/3) of the market potential will be captured by the Village of Newberry (3 units annually). There will also be 7 migrating households in Luce County each year seeking attached units in locations other than the Village of Newberry.

These 7 households also represent an upside opportunity that Newberry could pursue through initiatives like job creation, downtown reinvestment, and placemaking.

Additionally, the number of homes available for rent and for sale is very limited.

**Cost of Living**

Because the cost of living varies so greatly across the State, it is helpful to look at a series of indices to better understand the overall cost burden of housing on residents of Newberry.

The American Community Survey calculates the Selected Monthly Owner Costs as a Percentage of Household Income (SMOCAPI) to better understand the relative cost burden of owning a home in Newberry.

A rule of thumb is that 30% or more of income spent on housing is considered to be a housing cost-burden. Despite the low cost of home ownership, 27% of homeowners spend more than 30% of their income on housing costs in Newberry, which is slightly lower than the state average.

ACS 5-Year Estimates 2011-2015

Results of the analysis are intended to help communities and developers focus on Missing Middle Housing choices, which include triplexes and fourplexes; townhouses and row houses; and other multiplexes like courtyard apartments, and flats or lofts above street-front retail.

HOUSING ASSESSMENT

One concern identified by Newberry early on in the planning process was the prevalence of blight in the community and the inability for the Village to address the blight through local ordinance enforcement.

To better understand housing condition trends in the Village of Newberry, the project team conducted an external visual housing quality assessment of all housing structures within the Village limits. The team found that the housing stock in Newberry differs greatly from home to home within a single block. Following is a detailed summary of the results.

Methodology

The condition of each structure was recorded using an ArcGIS collector application that allows for immediate and reliable data storage and compilation.

A housing unit can be a detached, single family home, an attached home, or an apartment or condo in a multi-family building. A unit is different than a structure, because one structure could contain several housing units. This is an important distinction because the team could only collect data on housing structures, which precludes any assessment of individual units if located inside a structure.

The team used a checklist that ranks homes based on the amount and severity of the damage visible on the exterior of the home. No interior assessments were conducted. The table on the following page is an example of the criteria considered and
The scoring system is based primarily on assessing the quality of the structure; therefore some chipped paint does not weigh as heavily as structural damage such as missing windows or a building that leans. The types of repairs are categorized as “major,” “minor,” or “no problem,” and the final score depends on the combination of major and minor repairs recorded. Based on the amount and type of repair needed, the team gave each housing structure one of the following scores:

In the table called ‘Housing Checklist’ is a more detailed description of how to distinguish between major and minor repairs for each housing feature. In this example, this home would be rated “good” because the home does not need more than two minor repairs.

**Findings**

710 structures were visited and assessed. Of all the assessed structures, 524 were ranked “good.” Almost 74% of assessed structures are considered in good condition. 138 structures were ranked “fair” (19.4%), and 21 were ranked “poor” (2.9%). Five structures were considered blighted enough for demolition.

RISING TIDE - NEWBERRY

General Housing Conditions: 10/14/2016

Data Source: State of Michigan Geographic Data Library

Housing Categories:
- Poor Quality
- Average Quality
- Great Quality
- Vacant
- Non-Residential / Empty

Housing evaluation fieldwork conducted October 12 - 14, 2016

DRAFT - Updated October 2017
As can be seen on the map of General Housing Conditions, the homes that were rated as good, fair, and poor are fairly evenly distributed throughout the Village. This is a good sign because it indicates that in every neighborhood throughout the Village, there are residents with the means and the commitment to take care of their property.

DEFINING NEIGHBORHOODS

To better define the neighborhoods in Newberry, the Village has identified five different neighborhood regions based on density, housing type, natural and constructed edges, and the function they serve for the community.

The neighborhoods depicted on the Neighborhoods map will serve as a starting point for the Village in helping members of the community establish formal neighborhood associations should they desire and also prove helpful in informing the residential zoning districts. Attributes such as average lot size and average setback distance should be based on the existing attributes of a neighborhood and the surrounding homes.

Centers & Edges

A neighborhood center is based on sense of place rather than geography. It is either an anchor institution, a landmark, or a frequently visited location that serves its members in some way. Listed in the next sections are existing locations that either already serve as neighborhood gathering space, or could in the future.

Edges define the boundaries of a neighborhood and are generally delineated by busy roads, railroad tracks, municipal boundaries, and natural features such as wetlands, lakes, or rivers. The Neighborhood map depicts the general edges of each neighborhood.

Northwest

Built in a traditional grid pattern, Northwest Neighborhood is bounded by McMillan Avenue to the south, the railroad tracks to the north, the Village limits to the west, and Newberry Avenue to the east. This neighborhood is made up of older homes with a mix of lot sizes, many of which are quite small. There are a mix of alleys and homes served by driveways. The majority of homes in this neighborhood are single-family, usually detached homes. There are a few opportunities for infill development within this neighborhood.

Centers: The County Historical Society, Sherman Park, and Taquamenon Land Theater.

Southwest

Built in a traditional grid pattern, Southwest Neighborhood is bounded by McMillan Avenue to the north, the Village limits to the west and south, and Newberry Avenue to the east. This neighborhood is made up of older homes with a mix of lot sizes, many of which are quite small. Most homes are served by alleys. The majority of homes in this neighborhood are single-family, with multifamily in the southwest portion of the neighborhood. There are a number of parks and recreational opportunities within this neighborhood.

Centers: Public Schools, Newberry Athletic Field, the Barn, and Knierium Park.

Northeast

Built in a traditional grid pattern, Northeast Neighborhood is bounded by McMillan Avenue to the south, the railroad tracks to the north, the Village limits to the east, and Newberry Avenue to the west. This neighborhood is made up of older homes on small lots. There are a mix of alleys and homes served by driveways. The majority of homes in this neighborhood are single-family, usually detached homes. There are a few opportunities for infill development within this neighborhood.

Centers: Taquamenon Outdoor Recreation Complex.
**South Central**

Built in a traditional grid pattern, South Central Neighborhood is bounded by McMillan Avenue to the north, Avenue C to the south, Newberry Avenue to the west, and Parmelee Street to the east. This neighborhood is made up of older homes with a mix of lot sizes, with larger homes that line Newberry Avenue. All homes are served by alleys and there is only one vacant parcel in this neighborhood.

*Center: Atlas Park*

**Southeast**

Built in a traditional grid pattern, Southeast Neighborhood is bounded by Charles Street to the west, the McMillan Avenue to the north, and the Village limits to the east and south. This neighborhood is made up of older homes with a mix of lot sizes, many of which are quite small. There are a mix of alleys and homes served by driveways. The majority of homes in this neighborhood are single-family, usually detached homes. There are a few opportunities for infill development within this neighborhood.

DRAFT - Updated October 2017
From a land-use planning perspective as well as an economic development perspective, it is important to take stock of the areas in the community that are ripe for redevelopment.

Because of the high quality public infrastructure already in place, Newberry is focused on incentivizing and supporting redevelopment first and foremost in the downtown.

With the low cost for real estate and a number of vacant buildings, the Village offers a supportive environment for redevelopment. This section provides an overview of the redevelopment ready sites in Newberry as well as some of the strategies the Village is using and plans to use to attract redevelopment.

**Priority Redevelopment Areas**

The Village of Newberry, and the surrounding area, has a number of sites that are currently fit to be redeveloped. These sites are either vacant buildings for sale, vacant land, or sites where there is space available for lease or rent. The Michigan Economic Development Corporation (MEDC) encourages communities to take a proactive approach to identifying and preparing properties to be redeveloped. A key element of the MEDC’s Redevelopment Ready Communities Program is to identify redevelopment ready sites and strategies associated with each site. As a part of this master planning effort, a number of sites have been identified on a redevelopment map and key attributes of some priority sites have been described. As a next step, the Village will want to collaborate with the Luce County Economic Development Corporation to actively list and promote these properties for redevelopment.

**Downtown Redevelopment**

Downtown Newberry is ripe for redevelopment. Despite positive momentum and a number of downtown businesses that have recently opened, there are still empty store fronts and the capacity for the Village to attract new businesses.
The Village has several opportunities in the downtown for rehabilitation and facade restoration. There are a number of buildings currently for sale that have the potential for rental rehabs or conversions into flats or lofts above main street. The following describes some high priority redevelopment sites in the downtown district.

**Former Falls Hotel**

Known as the Falls Hotel, this historically significant building is currently for sale for $139,000. The building is currently home to a popular coffee shop called Wave as well as Rockhill Studios, Forward, Great Waters Coffee Company, and The Falls Event Center.

The 17,708 square foot, three-story building has a working commercial kitchen, a lounge/dining room, 27 hotel rooms, and a historic brick exterior.

**The Pines Building**

Located just off the corner of John Street and Newberry Avenue, the Pine Building was once a general retail store and is currently vacant. At the time this plan was written in 2017, this two-story building was listed for sale for $20,000.

**Old Bank Building**

The Old Bank Building was once home to a number of different businesses including an art gallery, an antique store, and a natural food store. While the building has been vacant for a number of years, a number of businesses are poised to reopen there soon. The current owner is in the process of applying to the redevelopment programs available through MEDC. If the project is funded, there will be two apartments on the upper level and more accessible retail spaces on the ground floor. In addition, the exterior will be restored to the original appearance.

**John Street**

There are three parcels on Helen Street just east of Newberry Avenue that could be combined to support a mixed use development.

**Brownfield Sites**

According to the Environmental Protection Agency, a brownfield is “a property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant.” Often, brownfields are vacant or abandoned. Restoring brownfields is an important way to maximize existing infrastructure, wisely control future growth, and create economic opportunities.

**Tahquamenon Outdoor Recreation Complex**

This brownfield redevelopment project (TORC) is located on a parcel just north of the railroad tracks in the Village of Newberry.
The clean-up of the former Charcoal Iron plant was completed with MDEQ funds several years ago. The redevelopment funding will fund environmental remedies through capping activities including berming, seeding and mulch and paving of the parking lot and trails for the recreation complex. The Village of Newberry was also awarded funding from the Michigan Natural Resources Trust Fund in the amount of $300,000 to make a number of on-site improvements, including a new challenge course and playground equipment. Future fund-raising will be need to erect a support building for the park, with facilities for locker rooms, restrooms, concessions, meetings and storage.

Trails designated for walking and biking are funded for the TORC and it will function as a trailhead for bicyclists heading north to Tahquamenon Falls and Paradise.

**Former Lumber Yard**

This former lumber yard at the corner of McMillan and Charles Street near the Village Offices could be used in its current form for DPW functions, light manufacturing or could be demolished and redeveloped into residential or light industrial.

**SW Corner of M-123 and Avenue C**

These two vacant parcels are across from Napa Auto Parts and one block down from the school. It would be ideal location for commercial or mixed-use.

**Newberry Avenue across from Avenue D**

This vacant parcel is south of Napa Auto Parts. It could be ideal location for commercial or mixed-use.

**Luce County Industrial Park Expansion Project**

Although not located within the Village’s boundary, the 115 acre industrial park includes a number of shovel ready sites. The Luce County EDC constructed water, sewer, roads and a rail extension into the Industrial Park with partial funding from an Economic Development Administration Public Works grant. The County plans to attract companies to the Park that will be high volume rail users, and is consistent with the goals and objectives of the CEDS.

**PUBLIC SECTOR INITIATIVES**

There are a number of strategies Newberry can employ to incentivize redevelopment and to attract new businesses.

Collaboration is paramount to ensure a regional approach to
economic development and avoiding duplication of efforts.

Taquamenon Area Convention and Visitor’s Bureau

Tourism is a critical driver in Newberry’s economy with Taquamanon Falls drawing over 400,000 tourists a year. A Convention and Visitor’s Bureau would allow the Village to partner with surrounding entities to leverage tourism destinations in one supportive effort. Although past convention and visitor’s bureau (CVB) efforts have failed, there seems to be positive momentum to restructure membership within the existing CVB. The failure of the CVB to assess the room tax, like other Upper Peninsula CVBs, is significantly impacting the marketing of the greater Newberry area. As a result, tourism dollars that could be available are lost to other tourism communities, such as Munising, Sault Ste. Marie, St. Ignace, and Manistique.

Downtown Development Authority

The Village of Newberry is interested in exploring creation of a Downtown Development Authority (DDA) under Act 197 of Public Acts of 1975 of the State of Michigan, commonly referred to as the Downtown Development Authority Act.

This act was created in part to correct and prevent deterioration of business districts and to promote economic growth and revitalization. Under this Act, the Village could create an authority authorized to use tax increment financing to fund improvements to downtown and potentially acquire vacant properties to assist with redevelopment.

Design Standards

Design standards can be a proactive way for a local government to initiate revitalization by improving the public realm. Design standards are often included in the zoning ordinance as standards that apply to the Central Business District or as a separate overlay district. Examples of standards include requiring a minimum ground floor transparency, build-to-lines to preserve the traditional pedestrian centered development patterns, and streetscape elements such as signage, trees and pedestrian-friendly design. These standards would be useful in positioning Newberry as an inviting place for creative, mixed use developments that are pedestrian oriented.
This section details future land use and a plan for developing a zoning ordinance in Newberry to move toward implementing the Village’s vision for the future.

**FUTURE LAND USE**

The Michigan Planning Enabling Act of 2008 requires the inclusion of a future land use map and zoning plan in the master plan. The future land use map and districts identify a generalized, preferred organization of future land uses in the Village of Newberry. It is a general framework intended to guide land use and policy decisions within the Village over the next 15-20 years. It guides the development of a Zoning Plan and ultimately influences the new zoning ordinance. A table summarizing the future land use districts can be found on page 67.

**Future Land Use Map**

The Future Land Use Map is not intended to be used to identify future land use on a parcel-by-parcel basis, but rather to identify districts that may evolve within the Village. The Future Land Use Map shows the preferred locations for future development in Newberry. Existing land development patterns were used as a basis for establishing the Future Land Use Map.

The Village can be segmented into four land categories, which include: (1) Residential, (2) Commercial, (3) Recreation/Conservation, and (4) Public Service.

### Residential Districts

**Village Residential**

The Village Residential area is intended to preserve and enhance the small lot residential neighborhood within and adjacent to the central downtown area of the Village of Newberry.

**Multi-family Residential**

The multi-family district is designated to accommodate higher density residential use, such as apartments or a modular home development.

### Commercial Districts

**Central Business District**

The Central Business District
The A-OK Car Wash and A-OK Mini Storage are located in the Community Commercial Future Land Use District.

Recreation/Conservation District
This category is intended to include existing recreation property, areas planned for future recreation use, and other environmentally sensitive areas and natural resources.

Public Service District
The Village of Newberry is fortunate to have a variety of public facilities. This plan recommends a special district be designated for these properties that are located outside the Central Business District. The Public Service district would include the schools, DPW, etc.

Wetlands Overlay District
Newberry is fortunate to have a number of wetlands in the northern portion of the Village. Many of these wetlands are smaller and may not be protected under the State and Federal regulations. By including existing wetlands on the Future Land Use Map, the Village can consider the location of these resources when reviewing development proposals.

ZONING PLAN
According to Section 2(d) of the Michigan Planning Enabling Act (PA 33 of 2008), the Master Plan shall include a Zoning Plan depicting the various zoning districts and their use, as well as standards for height, use as residential. Uses may include a mix of housing types, including multiple-family units, and limited neighborhood services. Community Commercial
This district includes retail and service sector businesses that often require larger lots outside the downtown. Public services and non-profit organizations are considered compatible with allowable uses in this district.

Light Industrial
This district accommodates light industrial uses within the Village that would have a low impact on surrounding neighborhoods.

Mixed-Use District
The mixed-use district is intended to accommodate neighborhood services located within walking and biking distance to residences, while retaining the primary land use as residential. Uses may include a mix of housing types, including multiple-family units, and limited neighborhood services.

The A-OK Car Wash and A-OK Mini Storage are located in the Community Commercial Future Land Use District.
bulk, location, and use of buildings and premises. The Zoning Plan serves as the basis for the Zoning Ordinance.

**Relationship to the Master Plan**

As a key component of the Master Plan, the Zoning Plan is based on the recommendations of the Master Plan and is intended to identify areas where existing zoning is inconsistent with the objectives and strategies of the Master Plan, and to guide the development of the Zoning Ordinance. Because Newberry does not have a zoning ordinance, this plan will serve as the foundation for the Planning Commission as they undertake the development of a new Zoning Ordinance. The Zoning Ordinance is the primary implementation tool for the future development of Newberry.

**Documenting Existing Conditions**

Despite not having a zoning ordinance, Newberry was developed in advent of the automobile in a traditional grid system. Most setbacks are uniform and commercial buildings are close the the public right-of-way.

One important first step in developing the Zoning Ordinance will be documenting existing setback distances in each district.

Average setback distances, lot widths, and lot sized should be used as the foundation for the district regulations and boundaries. The Existing Land Use map will also be an important tool to inform the Future Zoning map for Newberry. Historic development patterns and general locations of existing residential, commercial, industrial, and open space will serve as the basis for the new zoning districts.

**Luce County Zoning**

Luce County provides zoning services for all the communities within the county, with the exception of Newberry. Zoning designations in surrounding communities, particularly those that border the Village limit, will also be useful in determining zoning designations for Newberry.

**Consolidation of Police Power Ordinances**

There are a number of police power ordinances that deal with issues related to land use that could be consolidated into the new zoning ordinance. Additionally, the new zoning ordinance will have to be written in such a way that it does not contradict existing police power ordinances.

The following is a list of ordinances that have components that relate to zoning:

1. Ordinance #6: Streets, Sidewalks, and Alleys
2. Ordinance #12: Construction
3. Ordinance #14: Mobile Home and Trailer
4. Ordinance 19: Width and Depth of Plats in Village
5. Ordinance 29B: Compilation of Property Use Ordinances
6. Ordinance 29C: Regulation of Fences
7. Ordinance 35: Trees, Vegetation, Set-backs, and Utility Connection
Under the direction of the planning commission, with citizen and stakeholder input, the Village of Newberry has identified five themes, each with corresponding goals and actions. Because this master plan takes a 15-20 year approach to planning, it is anticipated that these goals and corresponding actions could take up to that amount of time to be realized. The table on page XX outlines a planned implementation schedule for each action and includes a general time-frame for implementation, the party responsible for implementing, priority, and anticipated funding source.

GOALS AND ACTION STEPS

This section outlines the key goals and actions identified by the Village of Newberry. The goals and actions fall into five major themes, as listed below:

1. Governance & Leadership
2. Thriving Downtown
3. Business Attraction and Retention
4. Recreation-Based Prosperity
5. Strong Neighborhoods

Governance & Leadership

The Village of Newberry will continue to seek intergovernmental collaboration and transparency to support community development. Although a relatively small village, Newberry is a population center of the eastern Upper Peninsula. Given the rural nature and sparse population of the surrounding area, it is especially critical that Newberry collaborates with surrounding communities, non-profits, and regional governments to leverage social capital for the benefit the region.

Looking internally, there have been a number of changes in Newberry’s Village leadership. With these changes, institutional memory is lost, but new social capital and a fresh perspective is gained. Additionally, Newberry is embarking on its first ever master plan, and in that process, has created a new planning commission. The planning commission has the opportunity to provide proactive leadership.
and land use policies that will foster economic prosperity.

**Thriving Downtown**

Downtown Newberry has always been the hallmark and centerpiece of the Village. Many of the buildings date back to the 1800s, and offer a window into Newberry’s rich history. Although the architectural styles are rich with tradition, many of these buildings are also in dire need of repairs and facade improvements. Despite the relatively inexpensive cost to purchase these buildings, there are a number of other barriers to rehabilitation. The Village will need to institute creative and collaborative funding and implementation tactics to ensure the long-term prosperity and success of the downtown.

**Business Attraction and Retention**

The Village is committed to supporting existing businesses to help them continue to grow and react to changing conditions. Additionally, Newberry is looking for opportunities to support small business development and entrepreneurs.

Newberry is no stranger to losing young people to jobs elsewhere in the state or country. Partnering with educational institutions and others in the region will be crucial for providing high quality vocational training opportunities to keep the next generation of workers gainfully employed.

**Recreation-based Prosperity**

Newberry is blessed with being close to some of the most pristine natural assets in Michigan, including the Tahquamenon River and Falls, and Lake Superior. Critical to a comprehensive economic strategy will be leveraging these resources to support economic development. Newberry has the opportunity to position itself as a four-season recreational destination.

---

**VISION**

Over the next 15-20 years, Newberry will continue to restore and rehabilitate its core infrastructure to create a vibrant, mixed-use downtown that serves as a focal point of community, recreational and economic activity. Neighborhoods will be strengthened to provide a diversity of high-quality housing options that meet the needs of all residents. Newberry will continue to leverage its unique natural resources to define its character and position Newberry as a recreational hub for the eastern upper peninsula.
### Strong Neighborhoods

Neighborhoods are the building blocks of a strong, vibrant community. The Village will need to support strategies that preserve and enhance Newberry’s housing and neighborhoods. This includes exploring opportunities to modernize and expand elder housing, securing grants for housing rehabilitation, and providing a zoning ordinance that supports a diversity of housing options.

A comprehensive approach to recreation includes upgrades to Village parks as well as collaborative marketing and promotion of recreational assets outside of the Village limits.

**Capital Improvements Strategy**

Once the Master Plan is adopted, a future task would include the preparation and adoption of a Capital Improvement Program; or CIP. The Village of Newberry 2017-2021 Capital Improvements Program would provide a framework for the realization of community goals and objectives as envisioned in the Village’s Master Plan. All CIP projects are listed on a priority basis and reflected by fiscal year within the plan. The plan also includes an indication for providing the financial means for implementing the projects.

**Implementation Opportunities**

To realize its goals, Newberry will have to be proactive and take advantage of a variety of funding opportunities available and form public-private partnerships to implement key projects. The following is an overview of funding sources and programs the Village could use to implement priority actions identified in this plan.

**Economic Development**

The Michigan Economic Development Corporation (MEDC) Community Development division focuses on creating vibrant, sustainable, and unique places by providing economic development services and programs to attract and retain talent in Michigan communities. The concept of placemaking considers cultural and natural amenities, resources, and social and professional networks.

MEDC offers a variety of grants and loans to Michigan communities to preserve downtowns, enhance cultural resources, and foster historic preservation.

**Community Development Block Grants**

The MEDC, on behalf of the Michigan Strategic Fund, administers the Community Development Block Grant (CDBG) program. The Village is currently not on the qualifying list of communities who are 51% low-to-moderate income or higher. This designation is important as it allows for the village to qualify for a number of CDBG programs including Infrastructure Capacity Enhancement (ICE) grants and Facade Improvement grants. The Facade Improvement grants could be valuable to downtown business and property owners who may want to reinvest in their current programs and be eligible for up to 50% grant funds.

Newberry plans to administer an income survey to determine the percentage of Low-and-Moderate Income (LMI) residents in the Village to qualify for through MEDC.

**Downtown Development Authority or Business Improvement District**

Newberry’s downtown serves as the foundation of the Village from both a historical and economic perspective. The Village hopes to revitalize the downtown by renovating vacant buildings and attracting additional business activity to the district.

One way the Village can promote economic development is by investing in public infrastructure in the downtown. Examples of improvements include street tree replacement, street lighting, landscaping, and hardscaping.

The Village may explore creation of a Downtown Development Authority, which is allowed under Michigan Public Act 197 of 1975, as amended. A DDA can institute a variety of funding options including tax increment financing mechanism, which can be used to fund public improvements in the downtown district.

Another strategy for improving the corridors is the formation of a Business Improvement District. A BID is a defined area where businesses pay an additional fee in order to fund projects within the district’s boundaries. The Village could also explore grants and other funding opportunities to pay for the improvements.
THE VILLAGE OF NEWBERRY

Community Members
While most public improvement projects are costly, time-intensive, and may have unintended consequences, this type of project removes a lot of the initial risk.

Becoming a City
To provide higher quality services for its residents and to reduce the overall tax burden, the Village of Newberry is interested in exploring the opportunity of converting from a village to a city. Since 1931 there has been a steady conversion of villages to cities in Michigan. A village is not a primary local unit of government because it does not assess or collect taxes. In addition to provision of services, this could also afford Newberry the opportunity to draft a new charter under the provisions of the Home Rule City Act (1909 PA 279).

Transportation and Trails
Safe Routes to School (SR2S) programs are sustained efforts by parents, schools, community leaders and local, state, and federal governments to improve the health and well-being of children by enabling and encouraging them to walk and bicycle to school. The National Center for Safe Routes to School offers several sources of funding for community projects that link neighborhoods with schools.

Place POP
PlacePOP is a service run by the Michigan Municipal League (MML) that supports low-cost, high impact events that showcase how powerful creating “place” can be. As a way to make downtowns more vibrant, MML develops short-term upgrades to public space to engage its residents in a new way. Moreover, a physical display provides a more visual, and interactive form of community engagement that engenders more participation than a public hearing. The idea is to reinvent space to help catalyze development, beautify underutilized areas, and create connections amongst community members. While most public improvement projects are costly, time-intensive, and may have unintended consequences, this type of project removes a lot of the initial risk.

Tahquamenon Convention and Visitor’s Bureau
Tourism is a critical driver in Newberry’s economy and promoting the area as a tourism destination is a high priority. Although past convention and visitor’s bureau (CVB) efforts have failed, there seems to be positive momentum for an inter-jurisdictional CVB through Northern Initiatives, an effort connecting marketing efforts of both Newberry and Paradise. This regional CVB would be a good strategy for leveraging the Tahquamenon Falls so the entire region can benefit.

Transportation Alternatives
Place POP
Transportation and Trails
Tahquamenon Convention and Visitor’s Bureau
Program is a competitive grant program that funds projects such as bike paths, streetscapes, and historic preservation of transportation facilities that enhance Michigan’s intermodal transportation system, promote walkability, and improve quality of life for Michigan citizens.

Housing
United States Department of Agriculture (USDA) Rural Development sponsors two programs for rural development that can be of help to Newberry homeowners.

The Single Family Housing Direct Home Loans is a subsidy for low and very low income residents to ensure that they live in safe and decent housing. These funds can be used to build, repair, renovate or relocate a home in a rural area. The amount of money loaned to a homeowner depends on income, debts, and assets.

Similarly to the Single Family Assistance provided by the USDA, Multi-family funds are available. The Multi-family Housing Loan Guarantee provides qualified private-sector lenders funds to lend to borrowers who wish to increase the supply of low- and moderate income individuals and families. The funds can be used for new construction, improvement, or purchase of multi-family rental units. The rent for the units is capped at 30% of 115% of the area median income. Complexes must have at least five units, but can also include detached, semi-detached, or row houses.
PATHWAY TO BECOMING A REDEVELOPMENT READY COMMUNITY
Six Best Practice Steps

ONE COMMUNITY PLANS & PUBLIC OUTREACH

- Adopted a master plan in the past five years, and must achieve:
  - Reflects a desired future direction
  - Identifies priority redevelopment area
- COMMUNITY PLANS & PUBLIC OUTREACH
- THE PLANS
  - Includes zoning regulation
  - ZONING REGULATIONS
- Includes a diverse set of community stakeholders
  - Includes key stakeholders
  - Public participation efforts go beyond the basic methods
- PUBLIC PARTICIPATION
- Includes all stakeholders
  - Include desired development outcomes
  - Infuse community champions
- ZONING REGULATION
  - Aligns with the goals of the master plan
  - Includes current and proposed sites
  - ZONING REGULATION

TWO ZONING REGULATIONS

- Includes flexible tools to encourage development & redevelopment
  - Provide for areas of concentrated development
  - Include clear roles & responsibilities for all bodies
  - Define & offer conceptual site plan review procedures
- RECRUITMENT & EDUCATION
  - Development review process
  - Promptly act on development requests
  - Qualify intakes with professional expertise
  - Training needs & attendance
  - Joint site plan review team
  - Identify & prioritizes redevelopment sites
  - Maintains guide to development, explaining policies, procedures & steps to obtain approvals

THREE DEVELOPMENT REVIEW PROCESS

- Includes available online
  - Development strategies
  - Includes market analysis, feasibility studies
  - ZONING REGULATION
  - Includes flexible parking standards
  - ZONING REGULATION
  - Includes detailed information & requirements
  - Provides technological upgrades
  - Includes citywide accumulation
  - Includes comprehensive information & requirements
  - Includes public participation processes
- PUBLIC PARTICIPATION
  - Includes the public
  - Includes a diversity of community businesses
  - Includes educational activities
  - Includes neighborhood businesses
  - Includes nonmotorized transportation
  - Includes bicycle parking, pedestrian sidewalk, shared parking, parking max, parking spaces, electric vehicle charging, bicycle parking, payment in lieu of parking, complementary use accommodation
  - Includes(designed) green infrastructure
  - Requires one or more: build-to lines, open store fronts, outdoor dining, ground floor transparency, street trees & parking lot landscaping
- ZONING REGULATION

FOUR RECRUITMENT & EDUCATION

- Set expectations for board & commission positions
  - Outline expectations & desired skill sets defined
  - Provide orientation packets to all board & commission applications
  - Coordinate with community & staff about training opportunities
  - Design & improve development tools
  - Assist the developer in soliciting input from the public
  - Joint site plan review team
  - Define the joint site plan team, include multiple disciplines
  - A clearly documented internal staff review policy
  - Define clear roles, responsibilities, & timelines
- RECRUITMENT & EDUCATION

FIVE REDEVELOPMENT READY SITES

- Gather basic information for prioritized redevelopment sites
  - Provide public engagement with high controversy sites
  - Identify potential resources & incentives for prioritized redevelopment sites
  - Identify mechanisms to support development
  - Include initial & feasibility studies
  - Determine & track development projects
- PUBLIC PARTICIPATION
  - Develop a marketing strategy
  - Encourage elected & appointed officials to attend trainings & share information
  - Notify elected & appointed officials & staff about training opportunities
  - Hold collaborative work sessions & joint trainings
  - Prepare annual report
- COMMUNITY PROSPERITY

SIX COMMUNITY PROSPERITY

- An approved economic development strategy
  - May be part of the master plan or annual budget
  - Connects to the master plan & capital improvements plan
  - Identify opportunities & challenges within the community
  - Incorporate recommendations for implementation
  - Coordinate with a regional economic development strategy
- COMMUNITY PROSPERITY

O ECONOMIC DEVELOPMENT STRATEGY

- Encourage elected & appointed officials to attend trainings & share information
- Notify elected & appointed officials & staff about training opportunities
- Hold collaborative work sessions & joint trainings
- Prepare annual report
- COMMUNITY PROSPERITY
